

SWISSLEDLIGHTS OHT

Outdoor Hybrid Flashlight
- Solar and Dynamo powered

Flashlights for Outdoor

Flashlights are available in thousands of versions and models. Is there anything at all that can be improved?

The new hybrid flashlight from SIStech

More and more people spend their free time outdoors in the wonderful nature. In any case a flashlight should belong to the equipment - ideally a model that will always work and will never use new batteries.

This is what the new hybrid flashlight from SWISSLEDLIGHTS SIStech AG can do:

No batteries needed

The new Hybrid Flashlight from SIS

tech is self powered. In the daytime solar cells will charge the built-in rechargeable batteries. Additionally this flashlight contains an integrated high performance cranking power generator in case of emergency (foldable).

Latest LED-Technology

The new Power-LED-Chips produce a glittering bright light with lowest power consumption and a technical lifetime of up to 100.000 hours.

Waterproof, robust and shock resistant

An outdoor product must be resistant to anything possible. The new hybrid flashlight from SIS

tech is absolutely waterproof up to 5 meters under water and accordingly is "fit for the tropics".

Light and compact

The new hybrid flashlight is compact (14.7 x 6.15 x 4.5cm) and merely weighs 176 gr. and therefore is light enough to swim on water.

Technical Specifications

| | | |
|-------------------------------------|---|--|
| Dimensions | : | 14,7 x 6,15 x 4,5cm |
| Weight | : | 176 gr. |
